

## The Integral Development of the U.S. Library System

*Chen Y. Fan*

### Abstract

According to our study and observations, modern libraries are complicated and influenced by environmental factors. In order to improve library performance, library administrators must recognize the managerial problems and the integral development of the library.

Because of the direct competition with other organizations for scarce resources, the shift in population structure, the impact of innovative technology and new role expectations, this paper aims to analyze the integral development of the U.S. library system with a view to overcoming its future challenges.

**Key Words:** library integral development, library planning, social structure changing
