

New Online Reference Work

Wiley StatsRef: Statistics Reference Online

A comprehensive online reference resource which covers the fundamentals and applications of statistics in all fields where it is widely used. This is the most inclusive, authoritative, online reference source available in statistics.

Hosted on **Wiley Online Library**, Wiley StatsRef is aimed at advanced undergraduates, postgraduates, teachers of statistics, and for experienced researchers entering a new part of the field for the first time.

Comprises:

- ▶ Over 6,000 articles from across the breadth of Wiley's extensive reference resources in statistics - equivalent to over 30 volumes in print
- ▶ Over 30,000 cross-references and related articles added
- ▶ Searchable by article or topic
- ▶ Regularly updated with new and revised content
- ▶ All articles are linked to each other to create a self-contained work
- ▶ Articles in Wiley StatsRef have been carefully selected from the following eight products in Wiley's existing online reference work portfolio, with thousands of new cross-references and links to related articles added to hugely enhance discoverability and ease of navigation:
 - **Encyclopedia of Actuarial Science**
 - **Encyclopedia of Biostatistics**
 - **Encyclopedia of Clinical Trials**
 - **Encyclopedia of Environmetrics**
 - **Encyclopedia of Quantitative Risk, Assessment and Analysis**
 - **Encyclopedia of Statistical Sciences**
 - **Encyclopedia of Statistics in Behavioral Science**
 - **Encyclopedia of Statistics in Quality and Reliability**

WILEY

Editors

Founding Editors

N. Balakrishnan (co-Editor, Encyclopedia of Statistical Sciences) is Professor of Statistics in the Department of Mathematics and Statistics at McMaster University. He holds numerous honors, awards, and editorial positions in the field of statistics. He has published more than 50 books on various subjects in the discipline.

Theodore Colton (co-Editor, Encyclopedia of Biostatistics) has more than 60 years of experience in biostatistical and epidemiologic collaboration and consultation with health professionals. He is Chair Emeritus of the Department of Epidemiology and Biostatistics at Boston University School of Public Health. He is a prominent biostatistical and epidemiologic educator of clinicians and other medical researchers.

Brian Everitt (co-Editor, Encyclopedia of Statistics in Behavioral Science and Encyclopedia of Quantitative Risk Analysis and Assessment), now retired, was most recently Professor of Statistics in Behavioural Science and Head of the Department of Biostatistics and Computing at the Institute of Psychiatry, King's College, London, UK. He is Editor-in-Chief of the journal Statistical Methods in Medical Research and a Section Editor of the Encyclopedia of Biostatistics published in 1998 by Wiley.

Walter Piegorsch (co-Editor, Encyclopedia of Environmetrics) is the current Editor-in-Chief of the journal Environmetrics and a previous Chairman of the American Statistical Association Section on Statistics and the Environment. He is also an elected member of the International Statistical Institute and a Fellow of the American Statistical Association (ASA).

Fabrizio Ruggeri (co-Editor, Encyclopedia of Statistics in Quality and Reliability) is Research Director at the Italian National Research Council in Milano. His interests are mostly in Bayesian and industrial statistics, especially in robustness, decision analysis, reliability, stochastic processes; recently, he got involved in biostatistics and biology as well.

Jef Teugels (co-Editor, Encyclopedia of Actuarial Science) coauthored four books and some 100 papers in the statistical literature. His main research areas started with queueing theory and analytic probability to move gradually to stochastic and statistical issues in insurance, extreme value analysis and environmetrics.

Current Editors

The current Editors are responsible for the ongoing development and updating of Wiley StatsRef:

- ▶ **N. Balakrishnan**
- ▶ **Brian Everitt**
- ▶ **Walter Piegorsch**
- ▶ **Fabrizio Ruggeri**

Paolo Brandimarte is full professor of quantitative methods for finance and supply chain management in the Department of Mathematical Sciences at Politecnico di Torino. He has extensive teaching experience in both engineering faculties and business schools, ranging from undergraduate to Ph.D. level, including several masters' level courses in quantitative finance and business analytics.

Geert Molenberghs is Professor of Biostatistics at the Universiteit Hasselt and Katholieke Universiteit Leuven in Belgium. He has published methodological work on surrogate markers in clinical trials, categorical data, longitudinal data analysis, and on the analysis of non-response in clinical and epidemiological studies.
